QA Automation Engineer with 5+ years of experience in manual and automated testing across web, mobile and desktop. Automates web with Cypress and Playwright in TypeScript (also Selenium), automates web service APIs in TypeScript, and automates mobile in Kotlin for Android and Swift for iOS. Runs the suites in GitHub Actions after deploys and publishes Allure HTML reports. At Ucontact, developed an integrated QA platform with AI-assisted test case generation and test case tracking, and uses Claude Code daily for development and automation work. Works in Agile teams for clients in the US, UK and LATAM.

Core Competencies

- **Web Test Automation**: Cypress and Playwright with TypeScript; Selenium; end-to-end and regression suites.
- **API Test Automation**: API automation of web services in TypeScript; Postman.
- **Mobile Test Automation**: Kotlin (Espresso, Jetpack Compose) for Android and Swift for iOS; BrowserStack, Bitrise, TestFlight, App Center.
- **CI & Reporting**: GitHub Actions workflows that run automation after deploys; Allure reports converting JSON results into HTML.
- **QA Tooling & AI**: Integrated QA platform with AI-assisted test case generation, test case tracking and reporting; Claude Code for AI-assisted development and automation; Jira, Xray, Zephyr Scale, TestRail, Azure DevOps.
- **Manual & Exploratory Testing**: functional, regression, smoke, performance and exploratory testing; test case and user story design across web, iOS, Android and Windows desktop.
- **Agile Delivery**: Scrum and Kanban; close collaboration with developers, product owners and designers; React and Next.js background.

Professional Experience

- **Ucontact by net2phone**
  QA Engineer *2024–Present*
  - Developed an integrated QA platform (Next.js frontend, Express.js backend, Supabase database) covering AI-assisted test case generation, test case and execution tracking, and reporting and metrics, integrated with Salesforce, Jira and GitHub, giving the team one place to plan, run and follow testing.
  - Own test automation for a SaaS contact center platform used by enterprise clients across LATAM: end-to-end suites in Cypress and Playwright with TypeScript, plus API automation of web services in TypeScript.
  - Built CI with GitHub Actions workflows that run the automation suites after each deploy, and Allure reporting that turns JSON results into readable HTML reports.
  - Run regression, smoke and performance testing each release; track defects in Jira and Azure DevOps with the developers; take part in sprint planning, refinement and retrospectives.
- **StartQA**
  QA Automation & Manual Tester (Freelance) *2021–2024*
  - QA for clients in the US and UK across web, mobile and desktop applications, including manual testing on Windows desktop.
  - Built web automation in Cypress and Playwright with TypeScript and ran manual testing on a digital wallet and expense-manager product, working with LaunchDarkly feature flags, Postman and MongoDB.
  - Built mobile automation in Kotlin (Espresso, Jetpack Compose) for Android and in Swift for iOS, using Bitrise and BrowserStack, reducing release validation time.
  - Ran automation through GitHub Actions workflows and produced Allure reports from JSON results.

- **Nareia Software**
  Mid Functional Tester, Mi Dinero Mobile App *2023–2024*
  - Member of the QA team for a personal finance and credit app on iOS and Android: functional, regression, smoke and exploratory testing of loan, payment and account flows.
  - Wrote and maintained test cases and user stories; ran regression across several development environments with App Center, TestFlight, Vysor, BrowserStack and Zephyr.
  - Reported defects in Jira with reproduction steps, severity and evidence.
- **Practia Uruguay**
  QA & Frontend Developer (Contractor) *2024*
  - Combined QA and frontend work on enterprise web applications (React, Next.js, TypeScript): Playwright and Cypress checks, cross-browser testing, design fidelity, API testing in Postman, and backend integration checks with MySQL Workbench.
  - Worked in Agile with GitHub, Jira and Confluence.
- **FG Web Design**
  Founder & Lead Developer *2020–Present*
  - Independent web studio with 19+ clients in Uruguay and Argentina; apply QA practice to every delivery (cross-browser, responsive, performance, technical SEO) with Cypress and Postman.

Education

- **Software Testing Center (CES Uruguay), Faculty of Engineering**
  Software Testing Diplomas *2022–Present*
  - Quality Management and Software Testing Diploma: planned 2027.
  - Professional Software Tester Diploma: in progress, completes Nov 2026. Coursework: performance testing, web services testing, functional testing techniques, web test automation, testing methodology and management.
  - Software Tester: completed 2022.
- **CoderHouse**
  QA Manual Tester (certification) *Mar 2023*
- **CoderHouse**
  Web Development, UX/UI Design, Advanced UX/UI Development *2021–2022*
- **Higher Technical Institute of Paysandú**
  High School Diploma, Computer Science *2020*

Certifications

- Android Development with Kotlin (Udemy, 2023); React.js Development (CoderHouse, 2023).

Languages

- Spanish (native), English (intermediate, B1–B2).
