

FELIPE GUTIÉRREZ ROMERO

QA Engineer | Manual & Automation Testing

Montevideo, Uruguay • +598 92 033 831 • fgwebdesign0@gmail.com
linkedin.com/in/felipegut • fgwebdesign.dev

PROFESSIONAL SUMMARY

QA Engineer with 6+ years of experience in manual and automation testing across web, mobile, and desktop platforms. Skilled in designing test strategies, building automated test suites with Cypress and TypeScript, and ensuring product quality throughout the full software development lifecycle. Experienced collaborating with cross-functional teams in Agile environments for international clients across the US, UK, and LATAM. Combines a strong QA mindset with hands-on frontend development background (React, Next.js, TypeScript), enabling end-to-end understanding of product quality from code to user experience.

WORK EXPERIENCE

QA Engineer

2024 — Present

Ucontact by net2phone

- Design and execute manual and automated test cases for a SaaS contact center platform serving enterprise clients across LATAM.
- Develop and maintain end-to-end automated test suites using Cypress and TypeScript, improving regression testing coverage and reducing manual effort.
- Identify, document, and track defects through the full bug lifecycle using Jira and Azure DevOps, collaborating directly with developers to ensure timely resolution.
- Execute regression, smoke, and performance testing on each release cycle to guarantee product stability.
- Participate in sprint planning, refinement, and retrospectives within Agile/Scrum methodology.

Founder & Lead Developer

2020 — Present

FG Web Design — Web Development Studio

- Founder and lead developer of FG Web Design (fgwebdesign.dev), an independent web development studio based in Uruguay, specialized in WordPress, WooCommerce, and Next.js solutions for SMBs and corporate clients.
- Successfully delivered projects for 19+ clients across Uruguay and Argentina, including e-commerce platforms, corporate websites, landing pages, and custom web applications.
- Manage the full project lifecycle end-to-end: requirements gathering, technical proposal, UX/UI design, development, QA, deployment, client training, and post-launch support.
- Apply QA best practices to every delivery, ensuring cross-browser compatibility, mobile responsiveness, performance optimization, and SEO technical implementation.
- Handle client relationships, scoping, contracts, and recurring monthly maintenance plans, demonstrating strong business and communication skills alongside technical expertise.

Functional QA Tester — Mi Dinero Mobile App

2023 — 2024

Nareia Software

- Worked as part of the QA team for Mi Dinero, one of Uruguay's leading personal finance and credit mobile applications, ensuring quality across iOS and Android platforms.
- Executed functional, regression, smoke, and exploratory testing on each release cycle, validating critical user flows such as loan requests, payments, and account management.
- Created and maintained detailed test cases and user stories aligned with product requirements and acceptance criteria.
- Reported and tracked defects in Jira, providing clear reproduction steps, severity assessment, and supporting evidence for the development team.

- Collaborated closely with developers, product owners, and designers in an Agile environment to deliver stable releases.

QA & Frontend Developer (Contractor)

2024

Practia Uruguay

- Worked as a contractor delivering frontend features for enterprise web applications using React, Next.js, TypeScript, and Tailwind CSS.
- Combined frontend development with QA responsibilities, ensuring code quality, cross-browser compatibility, and adherence to design specifications.
- Collaborated with cross-functional teams using GitHub, Confluence, Jira, and Postman in an Agile environment.
- Contributed to backend integration tasks involving MySQL Workbench and API testing through Postman.

QA Tester (Freelance)

2020 — 2023

StartQA

- Delivered QA services for international clients in the US (San Francisco) and UK across web, mobile, and desktop applications.
- Built mobile automation test suites in Kotlin (Espresso) for an Android application of a US-based client.
- Implemented web automation projects using Cypress and TypeScript, covering critical user flows and reducing release validation time.
- Conducted manual testing on Windows desktop and web applications, ensuring cross-platform compatibility and stability.

Web Developer

2019 — 2020

DirecTV

- Designed and developed web assets and graphic content for the Marketing department.
- Managed social media content and supported the digital presence of the brand.
